It's all about the details

Incredible features that make your ride complete

RAV4 Limited shown in Blizzard Pearl.

The beauty is in the details with the new RAV4. Its redesigned interior offers added legroom for rear seat passengers, thanks to sleek front seatbacks. An acoustic glass windshield along with sound absorption materials featured throughout the vehicle help to prevent noise from entering the cabin, creating a whisper-quiet ride. With thoughtful interior features, available French stitching on the premium seats, metallic-toned gauges and available illuminated front cupholder, RAV4 offers an interior that's so cozy, you won't want the ride to end. Even on those really long road trips.

THOUGHTFUL SEATING

Available driver seat memory allows you to store your preferred seating position so you can begin every trip from where you left off. RAV4 also features available sport seats with side bolsters to keep you snug and secure the entire ride.

DUAL ZONE AUTOMATIC CLIMATE CONTROL

Comfortable passengers are happy passengers. This available system lets you and your front passenger regulate your own environments with individual temperature controls, so you can keep your cool the entire trip.

DRIVER AND FRONT PASSENGER HEATED SEATS

Available SofTex®-trimmed seats offer two heating modes that allow the driver and front passenger to select a setting for optimal comfort.

RECLINING SECOND-ROW SEAT

Treat your friends and family like first-class passengers. By simply pulling a handle, the rear seats recline giving you 944 mm (37.2 inches) of legroom to enjoy.

JBL® DISPLAY AUDIO SYSTEM WITH NAVIGATION*

The available JBL® Display Audio System features a 6.1-inch touch-screen with Bluetooth®3 wireless music streaming, and a unique "text-to-voice" feature that converts text messages from your phone into voice messages, which play through the vehicle's speaker system.

Playing comes naturally

With advanced technology at your fingertips

Whether you're choosing your favourite song, checking your voice messages, or deciding the route of your next adventure, RAV4's got you covered. And thanks to the newly designed dynamic instrument panel, everything is arranged around the driver for easy and convenient use.

MOONROOF

RAV4's available power moonroof gives you a great view of the sky, day or night.

BLUETOOTH®3

Hands-free Bluetooth®3 wireless technology allows you to operate your compatible cellphone with your hands safely on the wheel.

SMART KEY SYSTEM

When you approach your RAV4 with the available Smart Key fob in your pocket or purse, the interior lights will automatically illuminate. The front doors and liftgate can then be opened with the touch of a handle, and the engine can be started or stopped with the push of a button.

PLUG AND PLAY

Plug your MP3 player into the standard audio auxiliary input jack to listen to your favourite tunes.

Versatile space

Fits whatever adventure you've got planned

For the driver who's always on the go, the 2013 RAV4 is designed to make every trip as simple and convenient as possible. RAV4's rear cargo area is easier than ever to access with a new available power liftgate that can be opened easily with just a push of a button. The spare tire has been repositioned to fit

under the cargo floor and out of sight, which not only creates added space in the cargo area, but also provides you with a clear view out the rear window. And with a lowered load height, you can pack your cargo faster and with less effort. It also makes the perfect place to sit and watch the sunset with a friend or two.

ADJUSTABLE POWER LIFTGATE

The available adjustable power liftgate has an innovative height-adjustment memory feature that can be set to open to your preferred height. Simply raise the liftgate to your ideal height, then press and hold the cargo door button for two seconds until a confirmation beep sounds. Now, whether you open the liftgate via handle or key fob, it will rise to the desired height every time.

OF CARGO SPACE

MAKE MORE ROOM

When you need extra space in a hurry, RAV4's 60/40 split rear seatback can fold-down easily to create a wide, flat and spacious cargo area.

The thrill of being in control

That's as exhilarating as it is smart

An incredible drive starts at the engine. The standard 2013 RAV4 2.5-litre DOHC engine produces 176 horsepower along with 172 lb.ft. of torque to make short work of long roads. And with its Dual Variable Valve Timing with intelligence (Dual VVT-i) technology, it's also amazingly efficient. The all-new 6-speed Electronically Controlled automatic

Transmission with intelligence (ECT-i) keeps RAV4's engine in its sweet spot to optimize power output, while continually adjusting itself to suit your driving style. The new transmission also features Sequential Shift Mode, which allows the driver to take control of the shifting manually.

ALL WHEEL DRIVE

We believe the driver should be in charge of the excitement. Whether you're on an open paved road or a bumpy, windy trail, RAV4's all new available Dynamic Torque-Control All Wheel Drive (AWD) system distributes engine power from front-to-rear, giving you maximum control on a variety of surfaces. RAV4 also comes available with a Lock Switch, which when engaged, provides further traction among all four wheels when on muddy, sandy or snowy surfaces.

DRIVE MODE SELECT

Drive Mode Select enables you to make your RAV4 more responsive or efficient. ECO mode moderates the throttle response, and climate settings for increased fuel efficiency. Sport mode alters the powertrain for faster gear changes and more dynamic throttle mapping. In RAV4 AWD, Sport Mode also adjusts the distribution of engine torque based on steering input to enhance cornering ability.

RAV4 XLE shown in Barcelona Red Metallic.

AERODYNAMIC EFFICIENCY

RAV4's exterior has been redesigned for more than just looks - it's now more aerodynamic and fuel efficient. Aerodynamic fins on the outer mirrors and the combination lamps help to manage air turbulence around the vehicle. Underbody covers and a rear spoiler also help enhance airflow management to reduce drag.

RETUNED SUSPENSION

Mated to this stronger, stiffer body structure is an improved and retuned suspension system with optimized spring rates and shock absorbers. The MacPherson strut suspension up front is paired with a double-wishbone type suspension in the rear, enhancing RAV4's overall ride quality.

Safety and innovation

In perfect harmony

Real adventure usually requires protective gear, so we’ve equipped RAV4 with a variety of active and passive safety features. Whether you’re en route to the cottage for the weekend, navigating through busy city streets, or travelling from one end of the country to the other, RAV4 offers a host of safety innovations to get you there safely.

8 AIRBAGS

Protecting you, your friends, and family is our first priority. That’s why RAV4 comes with a total of eight standard airbags. Driver and front passenger advanced airbag system (1,2), Driver and front passenger seat-mounted side airbags (3,4), Driver’s knee airbag (5), Front passenger seat cushion airbag (6), Front- and second-row side curtain airbags (7,8).

BACKUP CAMERA

When in reverse, the available backup camera displays the visible area behind the vehicle on the Display Audio Touch-Screen.

REAR CLEARANCE AND BACKUP SENSORS

The available rear clearance sensors notify you of obstacles that are detected behind the vehicle.

LANE DEPARTURE ALERT¹¹

The available Lane Departure Alert (LDA)¹¹ uses a camera to monitor visible lane markings, alerting you if you are drifting.

BLIND SPOT MONITOR⁹ WITH REAR CROSS-TRAFFIC ALERT¹⁰

Available on RAV4 Limited, the Blind Spot Monitor (BSM)⁹ with Rear Cross-Traffic Alert (RCTA)¹⁰ uses radar technology to help you identify vehicles that may not be visible in your mirrors. When BSM detects a vehicle in your blind spot, the system illuminates a warning indicator on the appropriate outside mirror. RCTA works in a similar manner, in that it alerts you to rear cross traffic that may intersect with your own vehicle’s path through both visual and audible warnings.

2013 RAV4 comes standard with the Star Safety System™. This integration of active safety features is designed to protect occupants by helping drivers avoid accidents in the first place.

VSC VEHICLE STABILITY CONTROL

Helps prevent slips and loss of traction by reducing engine power and applying the brake force to the wheels that need it.⁵

TRAC TRACTION CONTROL

Helps maintain traction on wet, icy, loose or uneven surfaces by applying brake force to the spinning wheel(s).

ABS ANTI-LOCK BRAKE SYSTEM

Prevents brakes from locking up by “pulsing” brake pressure to each wheel to help you stay in control in emergency braking situations.

EBD ELECTRONIC BRAKE-FORCE DISTRIBUTION

Redistributes brake force to help keep the rear wheels from locking up during sudden braking situations.

BA BRAKE ASSIST

Detects sudden or “panic” braking and adds the full pressure needed to help prevent a collision.⁶

SST SMART STOP TECHNOLOGY

Smart Stop Technology is designed to reduce engine power when the brake is firmly applied helping to bring the vehicle to a stop, even if the accelerator pedal is fully depressed.⁷

Toyota was the first full-line manufacturer to make all of the elements of the Star Safety System™ standard on every new vehicle. Visit toyota.ca for more details.

[1] All Toyota vehicles shown in this brochure, have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Toyota Dealer.

[2] Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors.

[3] Toyota tests certain Bluetooth® capable phones for compatibility with Toyota vehicles. Note that the recommendation of Toyota is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. Some vehicles equipped with Bluetooth technology are available with bilingual compatibility. Please see your Toyota Dealer for details.

[4] The Toyota Navigation System is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Rely on your common sense to decide whether or not to follow a specified route. Detailed coverage is not available for every city or roadway. Optional periodic geographic updates are available at an additional cost. The Navigational systems in some vehicles are available with bilingual capability. Please see your Navigation System Owner's Manual and your Toyota Dealer for further details.

[5] Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control.

[6] Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions.

[7] Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping.

[8] Toyota Canada is proud to say that all Toyota vehicles built in Canada are made from Canadian and imported parts.

[9] Do not rely exclusively on the Blind Spot Monitor System to determine if a lane change is safe. Always look over your shoulder and use your turn signal before changing lanes. There are several limitations to the function, detection, range and clarity of the monitor. For a complete list of limitations and directions regarding use of the monitor system, please see your Owner's Manual.

[10] Do not rely exclusively on the Rear Cross-Traffic Alert System. There are limitations to the function, detection and range of the system. You should also look around outside your vehicle, over your shoulder and use your mirrors to confirm rearward clearance. For a complete list of limitations and directions, please see your Owner's Manual.

[11] Lane Departure Alert is designed to read the lane markers of certain roads. If the vehicle approaches the outer limits of its lane, the system warns the driver that corrective action may be required. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your Owner's Manual for further information.
